## Cottonseed

**Cotton seeds** are the seeds of the cotton plant. Cotton seeds are ovoid, 3.5-10 mm long. They are densely covered with white or rusty, long and woolly hairs, called the lint, which is the main product used to make cotton textiles. and shorter hairs (linters). Commercially available cotton seeds are usually the by-

## Cottonseed

product of the production of cotton fibre by a cotton gin, which separates the lint from the seeds.

Fuzzy or delinted cotton seeds may be either fed to livestock or submitted to oil extraction, yielding oil, cottonseed meal and hulls. Cotton seeds contain about 20% of valuable cooking oil. A typical cottonseed crushing operation separates the seed into oil (16%), hulls (26%), meal (45.5%) and linters (8.5%).

## Cumin Seeds

**Cumin** is native to the Levant and Upper Egypt. It now grows in most hot countries, especially India, North Africa, china and the Americas.

Cumin seeds are a very good source of iron and a good source of manganese. Other nutritional are Protein, Carbohydrate, Dietary fiber, Vitamin A, B, C, E and K, Calcium, Phosphorus and Potassium.

We are working on the objective to deliver high quality cumin seeds to our clients' at most favorable prices.

## Coriander Seeds

**Coriander** is one of the oldest of herbs and spices. The fruit of the coriander plant contains two seeds which, when dried, are the portions used as the dried spice. It has an aromatic scent that is soothingly warm, nutty, slightly fruity, and complex.

Coriander seeds are available in Eagle, Scooter, Single Parrot, Double Parrot and Super XO & Badami Varieties.

## Fenugreek Seed

**Fenugreek seeds** are small, brownish yellow seeds, which have a pleasantly bitter flavour and strong aroma. The seeds are often toasted to enhance their pungent aroma, and then powdered alone or with other spices.

Common fenugreek seed have huge application in cosmetics and can be used for preparing soaps, perfumes and other similar products.

## Fennel Seed

**Fennel**, is aromatic, stimulant, and carminative spice. Fennel seeds are known for their cool, refreshing taste. India is the world's largest producer of fennel seeds.

It contains some unique compounds that positively impact health, which is a property that cannot be found in many other seeds.

Overall, it facilitates digestion, improves skin and hair health, reduces hypertension, reduces inflammation, prevents cancer and bone diseases, controls diabetes, improves oral health, and improves metabolism.

## Oilcake

**Cottonseed Oilcake** are mainly used for cattle feed purpose. Due to it's high Nutrition values, it is used as concentrated meal for milking animals.

**Peanut Oilcake** is having various use from Human Consumption to cattle feed. Additionally now a days it is used as Aqua feed as well for fishery. It is rich in fiber, protein and energy contents.

## Peanut Oil

**Peanut oil**, also known as groundnut oil or arachis oil, is a vegetable oil derived from peanuts. The oil usually has a mild or neutral flavor but, if made with roasted peanuts, has a stronger peanut flavor and aroma. It is often used in American, Chinese, Indian, African and Southeast Asian cuisine, both for general cooking, and in the case of roasted oil, for added flavor.
